SUMMARY

Proactive Computer Science student specializing in AI-driven automations and smart data workflows. Experienced in building solutions that boost productivity and streamline decision-making by combining email, spreadsheets, LLMs, and UI frameworks. Passionate about solving real-world problems through practical, impactful tech—from automating routine tasks to enabling data-backed insights. Skilled in Python, AI tools (LLMs, OpenRouter), and data analytics (Pandas, NumPy), with hands-on experience in developing intelligent systems like email summarization and sentiment analysis.

EDUCATION

CMR Engineering College

Bachelor of Technology in Computer Science - Data Science (CGPA - 9.04)

Nov 2022 – present

Hyderabad, Telangana

PROFESSIONAL EXPERIENCE

Infosys Spring Board : Internship 5.0

Intern

Oct 2024 – Dec 2024

Hyderabad, Telangana

- Designed and developed a scalable Online Food Ordering System, streamlining order processing by 25% and enhancing user satisfaction for 500+ customers through an intuitive UI and efficient backend.
- Optimized database queries using SQLite, reducing response time by 15% and improving system performance.
- Collaborated with a cross-functional team to deliver the project 1 week ahead of schedule, demonstrating strong teamwork and time management skills.

PROJECTS

Gmail Digest Generator with Urgency Detection | *AI, Python, Google API, OpenRouter, Google Sheets API*

- Automated email summarization system that reads daily inbox, extracts and classifies key mails using LLM (OpenRouter), and pushes structured priority-wise summaries to Google Sheets.
- Integrated urgency classification using OpenRouter, achieving 90%+ accurate tagging into High, Medium, Low urgency - improving email triage time and decision efficiency for busy professionals.

News Sentiment Summarizer | *AI, Python, OpenRouter (LLM), Gradio, NewsAPI, Sentiment Analysis*

- Built an AI-powered news analysis tool that fetches real-time headlines, uses LLM via OpenRouter to classify sentiment (positive/neutral/negative), and visually displays them in segregated Gradio UI blocks for intuitive consumption.
- Achieved over 92% sentiment classification accuracy on diverse headlines, enhancing user understanding of news tone and media bias in under 5 seconds per batch.

Hotel Booking Management | *Python, NumPy, Pandas, Matplotlib, Seaborn*

- Conducted data analysis on 10,000+ hotel bookings, identifying key trends such as peak booking months and cancellation patterns.
- Uncovered actionable insights, including customer segment behaviors and cancellation correlations, enabling optimized booking strategies and improving customer engagement by 20%.

SKILLS & COMPETENCIES

Programming & Scripting: Python, SQL, C++

AI & Automation Tools: LLM's ,OpenRouter, Cursor, APIs, Gmail & Google Sheets Automation

UI & Productivity Tools: Gradio, Google Workspace, VS Code, MySQLWorkBench

Soft Skills: Problem-Solving, Leadership, Communication, Team Collaboration, Time Management

CERTIFICATIONS & ACHIEVEMENTS

- Google GenAI Fundamentals – Covered GenAI concepts, LLMs and responsible AI.
- Achieved the HackerRank Software Engineer Intern Certification.
- Tata Consultancy Services - ION Career Edge - Young Professional Certification: Mastered soft skills (communication, presentations, resume writing, business etiquette) and technical skills (accounting, IT).
