SUMMARY

Dynamic and results-driven Computer Science student specializing in Artificial Intelligence (AI) and Data Science, with a strong focus on Generative AI and expert-level prompt engineering. Proven track record of designing and deploying scalable AI-powered solutions using Python, SQL, and cutting-edge Large Language Models (LLMs) to enhance operational efficiency, data accuracy, and user engagement. **Passionate about pushing boundaries in AI to deliver innovative, high-impact results through GenAI, Agentic AI workflows, NL2X systems, and scalable automation – turning research into real-world solutions.**

EDUCATION

Chaitanya Bharathi Institute of Technology

Nov 2022 – present

Bachelor of Engineering in Artificial Intelligence and Data Science (CGPA - 9.07)

Hyderabad, Telangana

PROFESSIONAL EXPERIENCE

ByteXI : Internship on Technical skilling

June 2024 – July 2024

AI/Automation Intern

Hyderabad, Telangana

- **Automated HR Workflows:** Developed UiPath bots to sync **100+ emails/day** to Google Sheets (**70% efficiency gain**) and sent auto-triggered WhatsApp alerts via Twilio API (**50% faster response times**).
- **AI-Powered Recruitment System:** Built a resume-screening pipeline using UiPath + Mistral-TB to extract, score (LLM analysis), and rank **50+ resumes** daily from Google Drive, **reducing hiring cycle time by 65%**.

PROJECTS

Query Forge AI | *Python, FastAPI, MySQL, Ollama(mistral), GenAI, Prompt Engineering, Frontend*

- Built an **AI-powered NL→SQL engine** with intelligent date handling, schema-aware validation, and instant execution UI, delivering end-to-end query roundtrips in **200–600 ms** on local Ollama setups, including features like schema inspector, data preview, query runner, query generation.
- **Production-style FastAPI service** with robust error handling and CORS, **modular LLM prompts for safe SQL generation**, and a polished frontend (status indicators, loaders, responsive tables), achieving high usability and low-friction onboarding via in-app DB settings and automatic table/schema discovery.

AnalyzeQuestion — AI Coding Pattern Detector | *Python, FastAPI, Ollama (Mistral), RAG, SQLite, Prompt Engineering*

- Built an **AI problem analyzer** that identifies algorithmic patterns (DP, graphs, greedy, search), estimates difficulty, and generates structured step-by-step solutions using **schema-aware prompting**, reducing study-to-solve time by **40–60%**.
- Designed **SQLite-powered lightweight RAG** for similarity retrieval from past problems, improving multi-pattern recall vs. no-RAG baseline; shipped a **responsive UI with history tracking and dark/light mode** for instant FastAPI + Ollama-based analysis.

PDF Query Intelligence Assistant | *FastAPI, Python, OCR, LLM (Mistral), PyMuPDF, Tesseract, Ollama*

- Built an end-to-end **PDF document intelligence system** that processes both text-based and scanned PDFs using **PyMuPDF + Tesseract OCR + Mistral-LLM**, enabling **natural-language querying, summarization, fact extraction, and section-aware insights**.
- Designed a **hybrid extraction pipeline** with automatic OCR fallback, noise-reduction, and chunk-aware context routing, delivering **85% faster information retrieval** and eliminating manual reading effort for **100+ page documents**.

SKILLS & COMPETENCIES

Programming: Python, SQL, HTML, CSS

AI/GenAI: LLMs (Claude, Mistral, Deepseek, llama, etc), Prompt Engineering, Ollama, HuggingFace, RAG

Automation & Integration : make.com, UiPath, Twilio, Sheets API, Google Search API, n8n(basic), Open Router, Groq

Frameworks & Tools : FastAPI, Flask, Gradio, Git/GitHub, Cursor AI, Google colab, Lovable, Google AI Studio

Data Science & Analytics: NumPy, Pandas, Matplotlib (basic)

Soft Skills: Problem-Solving, Leadership, Communication, Team Collaboration, Time Management

CERTIFICATIONS & ACHIEVEMENTS

- GenAI Workshop Certification from IIT, showcasing advanced practical knowledge in Gen AI techniques and LLM's.
- Completed a 4-day intensive workshop on Generative AI, Agentic AI, and automation workflows.
- Salesforce Associate AI Certification, showcasing foundational understanding and practical competencies in Salesforce AI technologies and solutions.
- HackerRank : Python (5 star) | LeetCode : 250+ problems
